Office Action Summary	Application No. 10/621,228	Applicant(s) BAILEY ET AL.	
	Examiner John R. Cottingham	Art Unit 2116	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-4 in the reply filed on 1/17/06 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Rodgers et al. U.S. Patent 6,883,107. Rodgers shows all of the claimed limitations of a method for disabling clocks in Figures 1-19b.

Regarding claim 1, a method for disabling clocks to at least one processor core of a plurality of processor cores comprising: calculating an executing core limit based at least in part on a workload; executing an n number of available threads (threads 0 and 1 in figure 3), wherein n is an integer, enabling an m number of processor cores, wherein m is an integer and is less than or equal to n, the number of available threads. (col.19, lines 29-Col. 22, line 54)

Art Unit: 2116

Regarding claim 2, wherein disabling clocks to at least one processor during an idle time period as the processor core waits for a memory operation. (see Figure 18 and description of Figure 18)

Regarding claim 3, wherein disabling clocks to at least one processor core results in decreased power consumption. (Disabling a clock signal reduces the power because the power for that clock signal is not being used.)

Regarding claim 4, wherein disabling clocks to at least one processor core allows for increasing the operating frequency of that processor core. (see first paragraph of "Background of the invention")

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rodgers et al. U.S. Patent 6,889,319, Nguyen et al. U.S. Patent 6,920,572, and Audrain U.S. Patent 6,931,506 show similar inventions.
